In progress	<b>Bugema University</b> Bachelor of Science in Software Engineering GPA: 4.51

PROJECTS

<b>Bugema University Website</b> This is the official website for Bugema University developed and maintained by a team with which i work as the frontend lead. Visit <a href="http://www.bugemauniv.ac.ug">www.bugemauniv.ac.ug</a> for more info
<b>ClyCites</b> I currently work as a backend and machine learning lead under this project. The project's purpose is to eliminate third parties in the agricultural sector thus focusing on bringing services directly to the stakeholders involved. Clycites leverages latest technology and innovation to provides a multi-functional platform that provides analytics to farmers, e-marketing services, crop and fertilizer recommendations and crop disease prediction. It also provides an A.I assistant to farmers.
<b>School Management System for Shining Stars primary school</b> A comprehensive system that handles pupils registration, assessment and also automatically generate report cards. For this project i work as the team lead. You can checkout the Shining stars website at <a href="http://www.shining-stars.vercel.app">www.shining-stars.vercel.app</a>
<b>Sycom</b> Sycom is a multi-functional web-based system that enables users to manage and share files and documents both on personal and organizational level. Sycom also provides a platform for real-time collaboration on documents with multiple users. I'm currently the team lead of this project. For more info visit <a href="http://www.sycom.vercel.app">www.sycom.vercel.app</a>
